How it Works...

A small customer service fee is assessed on all customer transactions

This fee is applied to each sale made on your credit card terminal

The fee is eliminated if the customer pays with cash, check or in-store gift card

The new software automatically determines the service fee and discount amounts

That's it, just that simple, no complicated procedures, just more money in your pocket

What would you do with an extra \$12,000.00 per year?
